The SimplyWorks Range of Wireless Computer Devices

You can control your computer or tablet wirelessly with the SimplyWorks range of devices.

Just connect a SimplyWorks Receiver to your computer or tablet, then pair it with a SimplyWorks Keyboard, Joystick, Rollerball or Switch to easily control your device from up to 10m away. Up to 6 controllers can be connected - perfect for including everyone in an interactive classroom.

Read about the fun & motivating SimplyWorks Toy Controllers on pg 98-100 too!

Literacy & Letter Identification

Look out for our lowercase keyboards which help young users to find and match letters. They also support people with emerging literacy.

Big Blue is a wireless Bluetooth keyboard pg 79

Improve iPad Access

Using a keyboard with an iPad can make typing much easier. Use our Bluetooth keyboards & Mice on pg 12

Keyboard Rest

A Keyboard Rest is an affordable way to improve ergonomics and accessibility. Designed to give a slight lift to the keyboard angle, making it easier to reach and more visible for the user. The keyboard can be fixed using self-adhesive velcro pads (available separately) for extra secure mounting.

For Standard Size Keyboards and Big Keys Keyboards

Covered Laptop Rest

The Covered Laptop Rest helps to prevent fiddling with the keys and glidepad and helps to focus attention on the screen activity. It can also be used to position an access device (eg. switches, joystick) directly in front of the screen, at an angle, for a good midline position. It raises the screen, providing excellent visibility, comfort and proximity. Fits up to 16 inch laptops.

Protective Keyguard

A Keyguard helps people who have trouble pressing only one key at a time or holding their arm above the keys, improving comfort and accuracy. It fits securely onto the keyboard and supports the user while they select keys through the guard.

Clear perspex version available for VisionBoard2, KinderBoard, MyBoard, BigKeys and SimplyWorks Keys. Metal version available for some keyboards – please specify.

Keyboard Stickers

Keyboard stickers can replace worn lettering on a standard keyboard, increase contrast for people with visual impairments, add colour or lower case letters.

Hi Visibility Pack contains four sheets: white on black, yellow on black, black on white and black on yellow, in both uppercase and lowercase letters. For use on a standard size keyboard. Full key set or alphabet only versions available. Lower case options for small or large keyboards.
