Echo MiniTechT

Personal listener for excellent sound amplification

The Echo MiniTech™ is a portable personal listener which can be used with either a headset or neck loop and gives excellent amplification in meetings, out and about or television listening at home. It uses a stubby microphone on a long lead to pick up sound and send it straight to your ears, helping you follow and engage in conversation and chat with your family and friends.

It can be used with a digital quality under chin headset, stereo headphones or if used with a hearing aid, a high powered neck loop that transmits the sound to the hearing aid when switched to the 'T' setting (check you have the T setting on your hearing aid). The MiniTech™ can be connected directly to the TV using an audio lead (not included). The MiniTech™ can also be used to listen to a public loop system, using a headset. By activating the T Switch, the personal listener picks up sound from the loop and sends it directly to your ears via the headset, ideal if you do not wear hearing aids.

The MiniTech™ comes with both stereo underchin headset and a high powered neckloop, catering for both requirements, giving you excellent value for money.

Echo MiniTech Pro

Personal amplifier with a wealth of useful features

Echo MiniTech Pro® digital personal listener offers exceptional sound quality that helps you hear more clearly, with or without a hearing aid. Offering the same features as the MiniTechT, plus with the addition of the following:

- A bright colour LED indicates the increase and decrease in volume control. The tone control function allows you to adjust the bass and treble of the sound.
- When connected directly to the TV you can press the "selector" button and you will hear other sounds in the room and if you press the "selector" button again, you will return to the TV sound. This is useful for wanting to speak to someone whilst watching TV.
- As well as being modern and stylish in design the MiniTech Pro® incorporates digitally controlled buttons which make the unit easier to use for those who may have dexterity problems
- The digitally controlled buttons allow accurate and quick volume control, easily adjusted by visual and tactile volume pads with large symbols and raised dots, making the MiniTech Pro® ideal for people who are not only hard of hearing but who may also have a visual impairment.

Language Development Pack

Sign Language resources for your class

The products in this pack assist teachers, therapists and parents to stimulate and develop language and literacy in the foundation and primary phases for children using sign language, children with intellectual disabilities & those requiring additional visual input.  1 x Days of the Week Banner (Large, on durable plastic)
 1 x Phonic Alphabet Banner (Large, on durable plastic)
 1 x Classroom labelling system (To place on objects in class)

Sign Language Training DVD

Use with the Language Development packs!

Featuring South African Sign Language, this DVD demonstrates all the Sign Language vocabulary used in the **optional** accompanying Language Development Packs. The DVD assists parents, teachers, therapists etc. with correct Sign Language production and retention of the vocabulary.

A variety of sign 'dialects' are available and can be customised according to the users needs. All signers used in the DVD's are themselves Deaf and use South African Sign Language as their primary means of communication.

Did you know?

Sign language for AAC users...

Sign Language can be a strong support for people who use AAC too! Signing alongside a symbol can help people to understand & use language more. Often, people who use AAC are taught 'signed English' which follows the grammatical order of spoken English, whereas the Deaf community use South African Sign Language which has a different word order and rules. Children who use AAC benefit from multi-modal input - that means seeing a sign, and a symbol, hearing the word, or even adding a real object too - which helps to reinforce the meaning of communication for some people. "Tiny Handz" offers sign language training for AAC!

Hearing Aid Care Kit

All you need to clean and care for hearing aids

This essential daily kit includes hearing aid batteries for cochlear implants and hearing aids, as well as a Hearing Aid Care Kit. Includes
 1 x Battery Tester for Daily Testing - important!
 5 x 6 Pack Size 13 Batteries
 5 x 6 Pack Size 675 Batteries
 5 x Storage Containers
 5 x Hearing Aid Clips.
 Hearing Aid Care kit includes: Cleaning Cup, Cleaning Capsules, Drying Cup, Drying Capsules, and a Wax Picker.

Sign Language Story DVD's

South African sign language - teach all to sign

Featuring South African Sign Language, this DVD features a range of Sign language children's stories and poems.

The DVD assists children, parents, teachers, therapists etc. with correct Sign Language production and retention of the vocabulary. Stories help to show use of the signs in context and in a flowing sentence, with repetition of some story lines providing an opportunity for more practice and increased recognition of the signs.

All signers used in the DVD's are themselves Deaf and use South African Sign Language as their primary means of communication.

The Bellman Range of Hearing Alerters

Wireless alerting system for people who are deaf or hearing impaired

The Bellman Transmitters and Receivers give you the freedom to move around in your house and garden, with a range of approximately of 30 metres and more. With backup batteries, the system works even when there is a power failure. Totally wireless, the systems are very easy and user friendly, with no professional installation is required. Just place the transmitter where you need it and take a portable receiver with you when you move around. The Swedish quality and award winning design provide great value for your money.

Doorbell detection
Detects all types of doorbells and alerts you when your friends arrive.

Telephone detection
Detects both phones and tablets and alerts you to calls and messages.

Baby Monitoring
Monitors your loved one around the clock and alerts you to every little gurgle.

Fire Protection
Supervises your home and wakes you if a fire should occur.

Door Transmitter

Alerts you when your doorbell rings

Simply place it close to your door bell. Transmits signal up to 250m. Detects all kinds of doorbells and intercoms. Can be programmed to recognise any sound. Includes batteries, and velcro for wall mounting.

Phone Transmitter

Alerts you if the phone rings

Can detect landline or mobile phones and even SMS messages.

Simply connect it to your phone socket. Includes batteries and velcro for wall mounting.

Can detect up to three separate sounds.

6.5 x 10 x 2.7cm.

Smoke Alarm Transmitter

Alerts you if there is a fire

It is activated by smoke and sends a signal immediately to your receivers. Includes battery, mounting plate, and screw for ceiling mounting. Suitable for use in cooking areas too as you can use 'toast' mode. Alerts you if the batteries are low. 10cm diameter x 3.5cm.

Baby Cry Transmitter

Alerts you if your baby or other person calls

Simply place it close to your baby. Adjustable sensitivity and delay. Optional Contact Mat accessory to alert you if your baby leaves her bed. Up to 250m range. Includes batteries, table stand and screw for wall mounting.

6.5 x 10 x 2.7cm.

Magnetic Switch Transmitter

Detects when a door or window is opened.

When the magnets are separated the transmitter signals the receiver which notifies you - using sound, lights or vibrations. Can send its signal to any of the compatible receivers. Must be connected to the Telephone transmitter. Cable length is 50cm.

Contact Mat Transmitter

Detects when somebody steps on the mat.

Used to notify you when someone gets out of bed or enters/leaves a room. Must be connected to the Telephone transmitter. When the mat is activated, the transmitter signals any receiver which notifies you - using sound, lights or vibrations. Cable length 2m. 72 x 39 x 0.2cm. Weight 300g. Colour Black.

Alarm Clock Receiver

Multi-function alert with light, sound and vibration

The Alarm Clock receiver alerts you when it's time to wake up, with a flashing light, a sound and a vibration with the included Bed Shaker connected. It is also a receiver for when the phone rings or when your baby needs you, flashing brightly to alert you. The alarm gradually increases to over 100dB. Four bright flashing lights. Has a backup battery for use during power cuts, and a Power adapter included. 12 x 9.2cm.

Pager Receiver

Easy to carry in your pocket or on your belt

The Pager receiver alerts you with clear vibrations and lighted symbols. It is small, lightweight and can easily be carried in your pocket or on your belt. Includes belt clip and safety cord. At night you can connect a Bed Shaker to the optional charger accessory. 5.7 x 2.9cm.

Portable Receiver

Easy to carry, with lights and loud sound alerts

The Portable receiver alerts you with amplified sounds and a flashing light. It has an adjustable volume up to 90dB and is very easy to carry. Can be connected to bed shaker. Up to 3 years battery life. Includes batteries, wall mount and screws. 13 x 3.6cm.

Bed Shaker Receiver

Vibrating system for use in bed or on a sofa

The bed shaker will alert even a heavy sleeper. Simply place the bed shaker under your mattress or pillow and plug it into any of the Bellman & Synthes receivers. The bed shaker works with all receivers and requires no internal battery. It can be connected to all our receivers. Cable length 2m.

Flash Receiver

Visual alert system with optional vibration

The Flash receiver alerts you with a flashing light and coloured symbols. You can easily attach a Bed Shaker to it for additional vibration. 140 H x 70cm W. Rotating top so you can easily direct the light. Mains powered. Battery backup model available.

Wrist Receiver

Easy to wear so you never miss an alert

The wrist receiver notifies you with vibrations when the doorbell or telephone rings, when your baby needs you or if the smoke alarm goes off. It's our smallest receiver to date. Wear it around your wrist so you can always be reached. Uses lights and vibration patterns. Includes charger & extra wrist band.
