

Buzzers - Set of 4

Press to obtain a fun sound - use in so many ways!

Great for quizzes - each player or group has their own buzzer to press when they have the answer. Fun cause and effect tools. Press to obtain a sound - honking horn, doorbell, boxing bell or boing. Similar to switches, without the need for a separate switch-adapted device. Engaging and interactive. Each requires 2 AAA batteries (to be purchased separately). For 4 years and over. Size: 9cm diameter

PeekaBoo Sound Boxes

Auditory perception skills and fun for all ages

Sound matching game to reinforce cognitive development. Set includes 12 sound boxes and a storage tray. Shake the cubes to hear a unique sound and find its match. Six unique sounding materials with matching pairs. Wooden cubes, soft plastic handles and translucent acrylic windows. Builds matching, concentration and auditory perception / discrimination skills.

Wooden Pegboard Puzzles

Fine motor skills while having fun

A classic therapy & inclusion tool that feels like fun! These wooden Pegboard Puzzles, in a variety of themes, are provided in a mixed pack of 3.

The peg attached to each puzzle piece assists those with poor fine motor control to place the puzzle pieces into position, increasing inclusion and play for those who find standard puzzles too difficult.

Fine & Gross Motor Pack - Mini

An inexpensive pack to develop many skills

Help your students to practice their motor skills with motivating activities at a variety of levels. Includes Lead-free painted wooden building blocks in assorted shapes; 2 x Bee or Ladybug Shoelace Fasteners; 10 x Bean bags, 5 x Wooden pegboard puzzles, 2 x Skipping ropes.

Talking Therapy Mirror

Record & see your speaking

A recording and talking device that allows the client to see the formation of his/ her words. Record a message up to 10 seconds long, then play back the message to listen & correct. Watching him/herself in the break-resistant acrylic mirror improves awareness. With adjustable volume and on/off switch. Colours may vary. Requires AA batteries. Size: 30L x 30W x 36cmH

One Hand Table Top Scissors

An easier way to cut...

Table Top Scissors with strong plastic rounded ends. Useful for people who have had a stroke, or have limited fine motor control. Place the base on a table, then simply press down with one hand to cut.

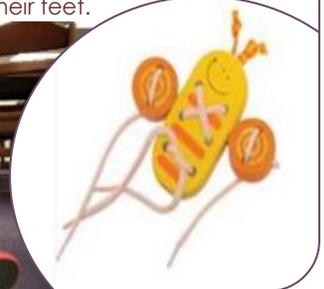

Grip base does not slip easily and improves independence at home or in school.

Shoelace Fastener Trainer

Busy Bee or Lovely Ladybird design...

Practice the fine motor skill of tying shoe laces using this attractive bee or ladybird (please specify) themed fastening trainer. A comfortable and fun way to learn. Also a lovely fine motor or rehabilitation activity for people who cannot reach their feet.

Assisted Daily Living Therapy Pack

Resources to develop independent living

Develop appropriate behaviour & independence, or regain skills after a stroke. Ideal for role playing activities, grooming and feeding, imagination, and practical skills. Includes an assortment of daily items, with corresponding Flash Cards with object text, to develop literacy and matching words to objects in a tangible way. For people with Intellectual Disabilities, 2nd Language English users, people learning life skills & independence.

therapy resources

Headmaster Collar

Excellent head support for better comfort

An attractive, cool, and comfortable cervical spine support. Originally designed for people suffering from arthritis, but equally of great benefit to people suffering from many other disabilities including: progressive neurological conditions, such as MND; congenital conditions such as cerebral palsy; whiplash; Parkinsons disease, head and spinal cord injury; burns etc.

Benefits include: coolness; attractive appearance; quick and easy fitting; comfort for daily use; access to tracheal tube. Constructed from surgical rubber tubing, around a malleable core. The tubing is covered with a brushed nylon material that allows the Velcro attachments to adhere anywhere.

Supplied pre-assembled and ready to use. Just bend it to the desired fit by hand.

Using the length of a straight line under the jaw, from the front of the chin to the angle of the jaw, choose the smaller collar if in doubt. Fitting Instructions are enclosed with the collar.

Large size, 127mm
Medium size, 114mm
Small size, 102mm
Junior size, 89mm
Child size, 76mm
Infant size, 70mm

Contains Latex. Please note that for hygiene reasons, this product cannot be returned.

Bead Base Lap Tray

Comfortable, sturdy & useful for elderly too

The bean-filled cushion base enables these trays to sit firmly in position on a table or lap. Perfect as a stable work surface close to the body, or a secure place for a tablet, plate, writing activity, games & more. This award winning product makes an ideal gift for all ages.

Colour and sizes may vary depending on availability.

Busylegz Feet Fidget Aid

Improved concentration & less disruption!

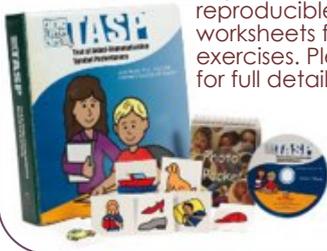

Great for fidgets, this below-the-desk aid can really benefit students with ADHD who need to move in order to maintain focus whilst learning. Can be used discreetly without disturbing other children. Size: 41 cmW x 28cmD.

TASP - Test of Aided Communication Symbols

Test of Aided Communication Symbol Preferences

TASP provides a starting point for designing or selecting an appropriate AAC device page set. TASP uses results to design communication boards and establish appropriate AAC intervention goals and strategies targeting symbolic and syntactic development. Scoring procedures are objective & rapid, test forms are reproducible, & includes customisable worksheets for a variety of practice exercises. Please see our website for full details.

New Reynell Developmental Language Scale

This is the fourth edition & retains a mix of play-based activities with a range of stimulus material that children can handle and direct as they carry out many of the assessment tasks. Suitable for children aged 3 years to 7 years 6 months. Provides diagnostic information about a child's production and understanding of spoken language. A highlight of the many benefits of the new edition is the Multilingual Toolkit, on how to adapt for children for whom English is an Additional Language.

Social Language Development Test - Elem. Book

Assesses language skills for social interaction

Many children with language impairment (LI) exhibit poor social interaction with others. These differences may appear as early as preschool and continue or intensify as these children mature. Test Purpose: The Social Language Development Test Elementary is designed to assess language-based skills of social interpretation and interaction with friends, the skills found to be most predictive of social language development. You will gain insight into your student's social understanding and social language competency. Subtests consist of question-answering tasks, interpretations of photographed scenes, and verbal explanations.

Renfrew Action Picture Test

Tests ability to provide information with language

The test has been designed to fulfill the need for a standardised test that in a short and simple form, stimulates children to give samples of spoken language that could be evaluated in terms of information given and the grammatical structures used, like words used to convey information, i.e. nouns, verbs, prepositions; present, past and future tenses; irregular forms of plural and past tenses; simple and complex sentence construction; and passive voice.

Shape Sorter

Chunky and easy to hold, beautiful quality

Chunky, tactile blocks for exploring simple shapes and colors. Encourages kinesthetic learning. Appealing and easy-to-hold, rubberwood shapes have oversized knobs with soft-touch plastic grips to assist fine motor skills and coordination. The durable puzzle board is sanded smooth and reinforced with soft plastic handles.

Children develop identification, color recognition and sequencing skills while exploring simple shapes and colors.

Dimensions
48 x 30 x 7.5cm

Threading Butterflies

Fine motor skills fun with this beautiful set of 6

Set of six lovely wooden butterflies with moving wings. Excellent resource for developing fine motor control, pincher grip, colour recognition and more. Set includes one each of red, yellow, green, blue, purple, orange. Approximate size 20 x 14cm.

Number Jigsaws - Pack of 10

Great for number recognition & counting

Ten brightly coloured numbers from 0 to 9, each in their own wooden palette. Each number has corresponding number of pieces, number 9 has 9 pieces, number 8 has 8 pieces etc. Great for matching number shapes to their corresponding spaces. Promotes number recognition, counting, and early math skills. Sturdy & durable wooden pieces. Each jigsaw approx. 28 x 22cm

Touch & Match

Tactile discrimination and matching

Match the different textured circles with the same texture on the wooden board. Teaches tactile differences and sensory perception. Touch & Match is soft and scratchy, ribbed and smooth with different textures to discover. A great tool for sensory therapy and matching skills.

Owl Kingdom Skills Builder

Colour matching and fine motor skills

Guide the coloured balls to the right place through the maze, using the magnetic pen. Planning, fine motor, visual perception development and great fun.

This quality resource is a favourite time and time again. The board contains coloured balls which are moved across the maze under a clear plastic cover using pens with a magnet in their tip.

My Little World Skills Builder

Maze skills, planning and choice making

Guide the coloured balls to the right place through the maze, using the magnetic pen.

Planning, fine motor, visual perception development and great fun.

The board contains coloured balls which are moved across the maze under a clear plastic cover using pens with a magnet in their tip. For 2 players.

Drive the Car Skills Builder

Double sided board - cars on the other side!

Copy the pattern on the activity cards to guide the coloured people (cars on the other side) through the maze. Planning, fine motor, visual perception development and great fun.

Flip the board over for Side 2 which has cars to navigate around the board.
